Kersi F. Porbunderwalla

In our complex corporate world - it is good to call Kersi when you need accounting or finance help with issues. Kersi has the knowledge, experience and trusted consultant resources.

Why Kersi?

Kersi has been the industry leader in solving accounting, finance and regulatory compliance as well as good governance, risk management, compliance and IT security (GRC) mandates, and new demands that change fast- faster than managers can respond to. That is why many companies seek Kersi's help.

Who in is Kersi.

Kersi* started the Copenhagen Compliance® in 2005, after his successful tenure as the Business Controller in the Nordics for ExxonMobil. Copenhagen Compliance has since solved several global Accounting, Finance, and GRC implementations as advisory, interim assistance, or project management for companies such as; IBM, Shell, Tata Group, Volvo to name a few, additional customer references are available on request.

One-Stop-GRC-Shop

The force of Copenhagen Compliance Group is to provide a unique holistic perspective of the entire GRC landscape. Helping you to determine the What, Why, When and How to implement the ever-changing regulatory requirements and audit standards, that creates solid stakeholder value. With that overall view in mind, we will provide guidance to take a structured and holistic approach to the enterprises GRC management, so that the perception of GRC risks is embedded at all levels of the organisation. This will help your organization to develop a roadmap to find the optimal approach through the complicated maze of financial compliance and best practices.

* Kersi F. Porbunderwalla: and his team has developed and implemented accounting, finance and GRC applications, frameworks and roadmaps. He is a consultant, lecturer, instructor, researcher, analyst and practitioner with a network of qualified accounting, finance and GRC consultants on 4 continents.

The Copenhagen Compliance® team supports comprehensive global oversight on accounting, finance, good governance, risk management, compliance and IT security (GRC) issues. The advisory assignments undertaken by us are based on our maturity model, Framework and CERP® methodology that provides a roadmap for enhanced GRC stakeholder reporting. Our LEAN GRC implementations and independent GRC review are based on the defined principles and practices of Copenhagen Compliance.
