

**BRIEF INTRO:**

CR serves as professor at CBS (Copenhagen Business School). His research focuses on M&As in combination with corporate governance and Risk Management. He has published his research findings extensively where he combines a multidisciplinary approach due to his unique background in both law and finance. He has acted as free lance advisor/consultant for large Danish firms where he also draws on his experiences from Danske Bank and Confederation of Danish Industries.

CR can help to identify the many new corporate governance and Risk Management initiatives that add value and point out the topics that do not provide value, but are to be considered as a mere reporting exercise. Caspar Rose's knowledge is based on several years of academic scholarship combined with a rare substantial experience from the financial sector.
