

Are you prepared for the EU Whistle-blower Protection Directive (and other global mandates)? Join this whole day online classroom Foundation Certification session on Whistle-blower implementation, update, execution, and monitoring issues on The Whistleblowers Day on the 23rd of June 2021.

The EU Commission and other global oversight authorities continue to revamp their Governance and Compliance structures to protect employees, assets, stakeholders, and privacy. After GDPR, E-privacy, the subsequent radical compliance implementation is the directive on the protection of whistle-blowers.

The mandates are in place, and the urgency is real

Blowing the whistle on corrupt, illegal, and greedy management and organisations can substantially impact the whistle-blower and the stakeholders. Robust and impartial processes must be in place to safeguard Whistle-blowers to preserve the institutions that serve us. The EU Commission has raised the bar regarding the corporate response with improved Governance and Compliance structures. Companies must comply with the new EU Whistle-blower Protection Directive, to be implemented by the 17th of December 2021.

Sign up for the Whistle-blower Certification program on the 23rd of June 2021 from 9:00 AM to 4:00 PM (CEST), followed by an online certification exam. We will review the current legal landscape with an in-depth understanding of the new directive, including the scope and impact, roadmaps and procedures for:

- ✓ creating effective channels and hierarchies for receiving Whistle-blower reports of wrongdoing;
- ✓ Staffing channels are appropriately armed with the required training;
- ✓ Enable full scope of Whistle-blower Confidentiality and Protection as envisaged in the EU Directive.
- ✓ Implementing the required Support and Protection measures;
- ✓ Understanding the Penal provisions involved and,
- ✓ Implement reliable processes for the Feedback Obligations.

We will go through the challenges that organisations face on this journey and possible ways to address them to create the corporate culture of transparency and accountability within the business practices.
